~~{Abstract}~~

~~{Structure}~~ A novel human polypeptide, a the-method for preparation ~~preparation~~ thereof, a cDNA encoding the polypeptide, a fragment selectively hybridizing with the sequence of the cDNA, a replication or expression plasmid containing the cDNA integrated thereinto, a host cell transformed with plasmid, an antibody against the polypeptide and a pharmaceutical composition containing the polypeptide or the antibody are disclosed.

~~{Effect}~~——The polypeptides of the present invention possess hematopoiesis regulating activity, ~~tissue generation/regeneration activity, activin/inhibin activity, chemotactic/chemokinetic activity, hemostatic and thromolytic activity, and receptor/ligand activity, therefore, they are expected to be useful for prevention and/or treatment of various diseases.~~
